

Belco Resources Equipment

HAY MOWING EQUIPMENT

Belco Resources utilizes the best of hay cutting technology for its mowing equipment. Whether you prefer cutting your hay or ditch banks with a disc mower or sicklebar mower, Belco Resources has a unit to handle your mowing.

DISC MOWER

The DCM Disc mower is available in 6, 7 and 8 disc with cutting widths in 96", 110" and 126". The extra heavy frame and high quality cutterbar is built strong to stand up to years of rough mowing conditions. The "A" frame is equipped with Cat 1 & 2 hitch and a heavy compensation spring to ensure high stability and durability. The safety breakaway bar provides protection by allowing the cutter bar to pivot rearward when it contacts an obstruction. Hydraulic lift is standard on all Belco Resources Disc Mowers.

SICKLEBAR MOWER

Forget the sicklebar mowers of old, Belco Resources' new double action sickle bar mower with adjustable 3 point hitch ensures a sharp clean cut on any type of grass. The double action cuts much cleaner with very little vibration. Safety release mechanism protects the unit from obstructions in the field. Units come complete with a compensation spring for major durability.

Hydraulic lift is standard on 6', 7', 8', and 9' models. Manual lift is standard on 5' models.

DISC MOWER

90 degree transport angle

Hydraulic lift standard
